

CS 120: Introduction to Programming

This class is designed as an introductory programming class for users with little or no programming background. Its approach is object-oriented and data-driven. It introduces sound programming techniques through hands-on exercises. It offers real-world MIS and business-related examples to help prepare individuals for their first job. Users learn how to plan, program, and debug computer applications using modern programming techniques.

Hours: 3

Prerequisites:

MA 145 or above.

Program: Computer Science

Semester Offered:

Fall
