

HN 290: Humanity and Science

How do we know what we know about the physical world? How do numbers work? What is science? Drawing on relevant scientific concepts and methodologies, this course examines issues that emerge at the intersection of humanity's engagement with, and relation to, the natural world, through primary texts and individual projects.

Hours: 3

Prerequisites:

HN 100 or HN 300.

Program: Honors

Semester Offered:

Fall
